

## O&M SERVICES

Energy Storage and Solar  
Operations & Maintenance

TruGrid  
maximizes  
the value of  
your clean  
energy  
assets.

**WE'RE THERE FOR YOU  
WHEN YOU NEED US**

You need responsive, quality service partners. And TruGrid has your back. We have those service teams, and we're ready to respond. We simplify the management and execution of complex variables associated with servicing and operating BESS and solar projects.

# Flexible. Reliable. Experienced.

## THE TRUGRID DIFFERENCE

The long-term reliability of your assets is our priority. That's why TruGrid works hard to align our battery energy storage system (BESS) and solar services with your unique needs and goals. We deliver high-quality and cost-effective services over the complete project life cycle.

## SERVICES TAILORED TO YOUR NEEDS

- // Management and execution of long-term complete BESS and solar O&M programs
- // Master service agreements (MSA) for time and materials services
- // Performance and availability structures
- // On-site services; construction monitoring, quality reviews and commissioning support
- // Specific short-term scope engagements, from project monitoring to field service campaigns
- // Spare parts and warranty management services

## Minimize Downtime. Maximize Value.

As your main point of contact for all O&M needs, we provide seamless service and rapid issue resolution to keep your projects online and profitable. Here's what sets us apart:

### WE ARE EXPERTS

- Decades of energy sector service management
- Diverse experience with numerous technologies and manufacturers
- Medium- and high-voltage services
- Deep engineering support capabilities
- Spare part recommendations and inventory management

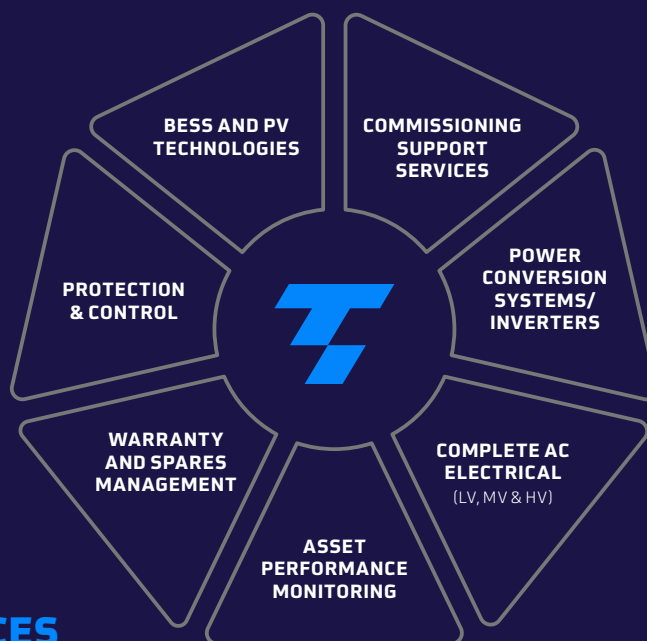

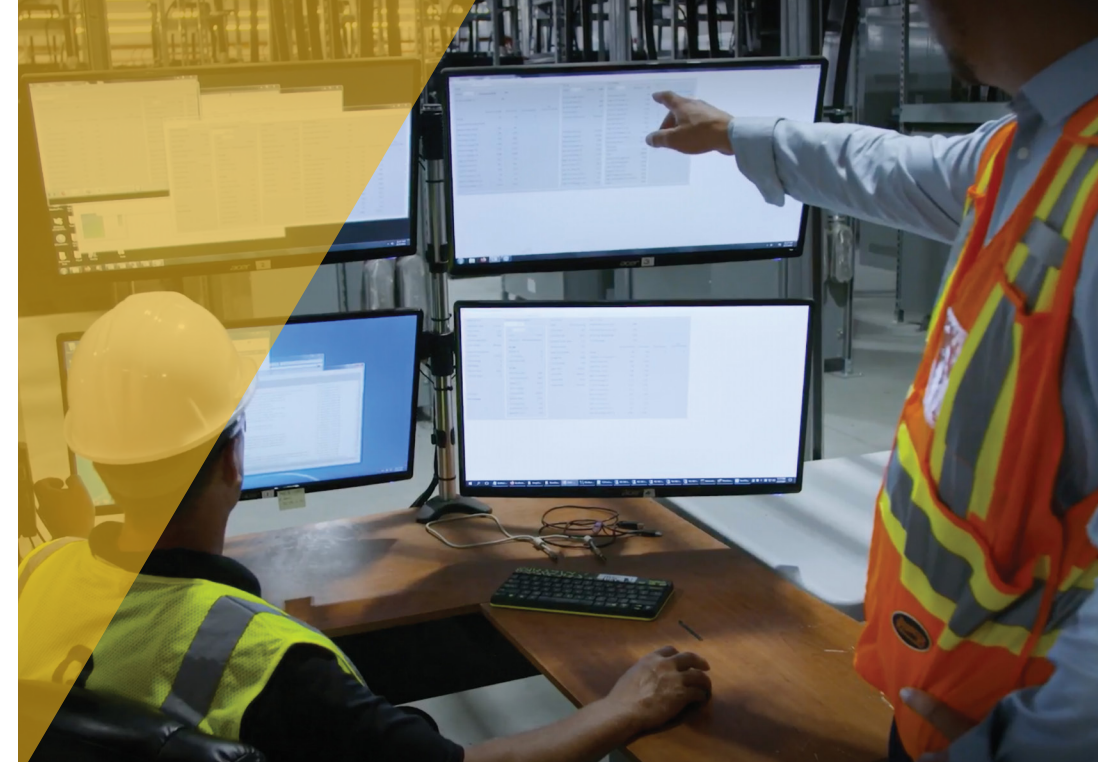

### WE ARE DEPENDABLE

- Responsive dispatch services
- Dedicated service technicians located throughout North America
- Quality equipment, tooling and vehicles
- Warranty support services

### WE UPSKILL AND EMPOWER

- Industry-leading health, safety and environment (HSE) program
- Comprehensive in-house technician development program
- Equipment manufacturer training partnerships

## O&M SERVICES

### ADVANTAGES

- Strong financial ownership
- Large team of dedicated in-house BESS engineers
- Health & safety and technician training programs
- Skilled technical teams and partnerships (where needed)

### CAPABILITIES

- Adaptable LTSA agreement structures
- Experience with multiple original equipment manufacturer technologies
- Geographic diversity
- Competitive technician rates
- Performance guarantee contract structure options

**Invest in your long-term success with reliable energy services that meet your unique needs.**
